UTComp Inc Licensee Spotlight: Axis Inspection Ltd.

Axis was established over 10 years ago and has steadily grown throughout the Kingdom of Saudi Arabia as a reputable & reliable inspection service provider. This ISO 9001 certified company is also currently the only NDT company who is certified by SASO (Saudi Standards, Metrology, and Quality Organization).

This organization is led by over 70 years' experience and is continuously driven by their passion in providing the best services for their clients in Saudi. Their commitment to bringing new technologies to their clients in KSA led them to connecting with UTComp. UTComps' UltraAnalytix™ system offers a state-of-the-art ultrasonic testing method to determine the condition of fiber reinforced polymer and other composite made industrial equipment. With Axis robust clientele based mainly in Oil & Gas, Petrochemical, Power, Water, and Fertilizer manufacturing, it was a unique solution for the demand of safe, accurate inspection without the immense cost of plant or equipment shutdown.

Axis continues to aggressively promote the value of UltraAnalytix™ within the Saudi market through continuous awareness campaigns with key client.

What sets Axis apart from their competitor's? Their dedication, their continuous search for the best technology, and passion for what they do. This is why clients keep coming back to them for their inspection needs.

If you need your FRP assets inspected, contact Abdullah Fawzan Al-Shammari at [Axis Inspections](#). We know he would be more than happy to help you.
